SHAPING A PLACE-BASED RESEARCH STRATEGY/

DEVELOPING A RESEARCH STRATEGY :: WHAT ARE THE PRIORITIES?
hosted and curated by /L Landscape Foundation
joint event with NZILA, Ngā Aho, UDF

SESSION 1 APRIL 5TH AUCKLAND, THE ASB CUBE, Wynyard Quarter, at 1pm-4pm

SESSION 2 APRIL 8TH WELLINGTON, VUW Vivian Street LT1, at 5.30 for 6pm-7.15pm

/L : Taiao, whenua, rural landscapes, cities, urban places – together, landscapes in the widest sense - are in constant change.

The issues facing us in the present occupy the day-to-day realities of professional practitioners, academics and communities.

Research is a key aspect of modern practice to understand change and look to the future, to provide an evidence base for decision makers.

A Research Hub is our vision - a system, a network and a database to support and coordinate research about landscape change.

A Research Strategy is the first step, to set the priorities for research that will populate a Research Hub

Guest lecture and introduction from
Dr Julian Bolleter, Deputy Director Australian Urban Design Research Centre

For registration to attend (no charge) go to urbandesignforum.org.nz

WORKSTREAMS

Help frame the workshop sessions. We will ask you to select your top four topics from the list below following your registration (in March 2019)

1. land governance, policy and protection
2. mapping and assigning value
3. blue, green and other infrastructure
4. cultural dimensions
5. population growth, urbanisation, economics and other pressures
6. heritage, landscape conservation and adaptive re-use
7. private/public access, land management and forestry
8. people, identity and nature connections
9. bio-regional spatial planning, land, sea, and food systems
10. bio-diversity, bio-security and ecological change

“Have the freedom to shape the focus and priorities of place-based research and how it could evolve in relation to the challenges ahead for Aotearoa / NZ in both a local and global context, this is a call to action”

SHAPING THE LANDSCAPE RESEARCH STRATEGY WHAT ARE THE PRIORITIES FOR YOU?

SUPPORTED BY THE NZILA, NGĀ AHO, UDF

KEY NOTE SPEAKER:

Dr Julian Bolleter is a researcher and teacher at UWA's School of Design, tackling issues facing Australian cities in the 21st century. Originally from Perth, he has worked internationally as a landscape architect in Sydney, Dubai, Boston and London.

Dr Bolleter now brings his international experience to his role as Deputy Director at the Australian Urban Design Research Centre, where he delivers commissioned research for state government planning departments, writing urban design/city-related books, conducting urban design projects, and teaching an urban design course.
